### >> [advectionagency](http://advectionagency)

From the deepest and coldest realms of space, there is a sound, a feeling and a style of music inside the mind of the producer and DJ known as Galaxi. It has been many years since the dwelling, meditation, and creation of his sounds. Inspirations include the genres: Ambient, Atmospheric Drum 'n' Bass, Deep House, Trance, Downtempo, Experimental, includes the artists LTJ Bukem, Jimpster, ASC, Blame, many more to mention, and also includes more inspiration from abstract/cinematic scores of movies and video games.

Galaxi represents the frequencies from deep space, planetary landscapes, synesthetic visions, and inner-feelings. Currently, he is working on new music, Dj'ing at numerous events across the globe, and also is producing as a duo with Tidal under the name 'Deep Gemini'. Pushing the sounds of the deep will bring forth only what the future holds.

Look out for a brand new sub-label from Galaxi, pushing the different styles of deep electronic music.

### Biggest things so far..

- Playing alongside LTJ Bukem at Progression Sessions & Bukem in session nights in Birmingham (UK)
- The Central Projection Tour in the USA 2007 saw Galaxi Playing in Chicago and San Francisco
